CREATE EXTRA SPACE

IN YOUR BASKET INSTANTLY
WITH THE NEW "PRINCE" CYLINDER

KUBICEKBALLOONS.COM

Fly with **2 PRINCE CYLINDERS** AND LEAVE YOUR 3RD TANK ON THE GROUND

Kubicek's new 36 kg – 19-gal (usable) "**Prince**" fuel cylinder gives the pilot option to carry **2 cylinders instead of 3** while providing **more open space and less weight in the basket**.

They are the "Sweet Spot" of fuel cylinders as they use the extra vertical space to the top of the standard basket yet 2 of them still provide ample fuel for typical flights plus reserve in balloons up to 3 400 m³ (120).

Standard basket height is sufficient for Prince cylinders usage.

The cylinder **textile cover may be branded** with custom embroidery.

Quick shut off valve and **textile cover** are already included in base price.

Fuel gauge is provided with **coloured zones** for faster assessment of remaining fuel level.
